DORTLAND (Or.) Feb. 3.—[Exclusive Dispatch.] Because Walter Ayers Woodward, little past 20, persisted in squandering all his substance and all he could borrow besides, in intertaining Mrs. Gladys Liewellyn Lamberton, comely and past 46, who proclaimed herself the widow of 3 New York millionaire, the youth was discharged yesterday from his position as teller in the United States Najional Bank here.

Today Mrs. Lamberton accompanied young Woodward to the marriage license bureau at the County Clerk's office, where a license was taken. Straightway the pair were married.

Tonight they took the Shasta Limited for California, declaring they would spead their honeymoon among the orange groves.

Young Weodward is the son of R. A. Woodward, member of an importing firm at Rochester, N. Y.

Eleven months ago he came here and took a position in the bank, which his ather had obtained for him. He wast to live at the Hotel Oregon, also, a few weeks ago came Mrs. Gladys Liewellyn Lamberton, polaiming herself a rich widow. He drew his spide tonight, "after we have finished our honeymoon in Southern California." In the state had obtained for him he spotlight in this city for a considerable time about two dears ago. She was the nurse and companion of old John Bryson, owner the cause of certain lawauits between phim. He wast to live at the Hotel Oregon, also, a few weeks ago came Mrs. Gladys Liewellyn Lamberton, polaiming herself a rich widow. He drew his saider than and honeymoon in Southern California."

Practically the entire afternoon session was occupied in reading letters written by Cooke to Mrs. Ford. The letters were written in an extremely passionate vein and teemed with salacious expressions and suggestions. These expressions were of such nature that the judge ordered them omitted in the reading.

Frequent references were made by Cooke to Comstock, who, according to the writer, was on intimate terms with Mrs. Ford. Several other persons were mentioned all of who, it is said, were on the same footing with the woman.

Attorney Thorndyke andeavored to force from Warriner a confession that his relations with Mrs. Ford had been more than friendly. At the first direct question to that effect, Warriner laughed heartily and said:

"That Is absurd."

MADRID, Feb. 2.—A monster meeting of Catholics, including many women of the aristocracy, was held today in protest against the reopening of the lay schools which were closed after the rebellious outbreak at Barcelona. Carlier and Conservative orators declared the schools were anarchistic in their teachings and the enemies of social order. They demanded the intervention of the church in all educational questions.

The Republican committee is organizing counter demonstrations. It has sent a message of sympathy to the French government and also dispatched its congratulations to David Lloyd George, British Chancellor of the Exchequer, on the recent Liberal victory at the polls.

Mr. Spangler told of the visits of an unidentified woman to the office and how she brought broth for Col. Swope to eat. Mr. Swope refused to eat the broth, Mr. Spangler said. The witness also testified that Col. Swope took medicine containing strychnine.

"A short time before his death, Col. Swope told me he did not believe he had long to live," testified Mr. Spangler.

Mrs. Easton said she could not exhaust the subject in fifty years, and would attempt to touch only the high places. She gave several succinet hints about the attainment of the New Idealism.

"At night," she said, "after you are undressed, put the tips of your fingers on the crown of your head, and imagine an angel pulling a cord out of you at that point, and pulling and pulling. That will lift all the body into the right position.

"Also, you must say to yourself," I am young, I am strong, I am nrm, and I advise pawing the floor as a horse does. This keeps your joints supple."

"Realize as you take up life that everything belongs to the great common whole," said she. "I still remember the thrill that came to me when I realized I was a sister to the little.

### HERMANN SAYS HE EXPOSED INDS HOMES FOR ORPHANS. LAND FRAUDS VOLUNTARILY.

[ASSOCIATED PRESS NIGHT REPORT.]

PORTLAND (Or.) Feb. 2.—The cross-examination today of Binger Hermann, who is testifying in his own behalf in his trial on a charge of conspiracy to defraud the government of part of the public domain, developed into a session of arguments between counsel, submission of documentary evidence and a long discussion between the defendant and his questioner.

Only when Hermann testified that on receiving the report of Special Agent Holzinger, he was astoanded to show by Hitchcock of the was told by the Secretary to produce it. The court, however, ruled that the point raised by the defense was well taken, and ruled the Hitchcock ossimony out.

When the pury had been recalled Hermann testified that he had not been directed by any one to take the Holzinger report to the Secretary, but had done so of his own volition. The rest of the day was consumed in the introduction of a series of letters from Hermann to Dr. C. E. Loomis, a ferumer special agent of the servement. [BT DIRECT WIRE TO THE TIMES.] SAN FRANCISCO, Peo. 3.—[Exclu SAN FRANCISCO, Peo. 2.—(Exclusive Dispatch.) Important developments are tooked for soon in the old Cofnstock lode at Virginia, Nev., as three leading Gold Hill mines, the Yellow Jacket, Crown Point and electer, in ave collegerater in a plan to work the lower levels, which are known to contain paying ore. These three companies each levied a 18 cent assessment Tuesday. The scheme is to repair the Yellow Jacket by means of which the Crown Point and Beicher companies can reach the lower levels. This incline will reach the 160-foot level in a few days, when prospecting in the three mines will begin. An agreement has also been made by three companies with the Ward Shaft Association by which, in consideration of handling the Gold Hill water on the 2100-foot level, they will contribute to the expense of extending the Ward Shaft Sp. feet to consect with the Yellow Jacket.

This plan means the immediate unwatering of 400 feet in length in the Gold Hill section of the Common of land the immediate unwatering of 400 feet in length in the Gold Hill section of the Common of land to the limited to the level of the Suth funnel. IDLE RICH PASSING AWAY.

(BY DIRECT WIRE TO THE TIMES,)

IBY DIRECT WIRE TO THE TIMES.]

NEW YORK, Feb. 3.—[Exclusive Dispatch.] "The Passing of the Idle Rich" is the title of a book telling of the worthiness of society which is being written by a society which we was a said Mr. Martin, "men who could afford to lead lives of idleness were considered honors to their country. Now they are considered disgraces. For years a gradual evolution has been creeping over the people of society. They have felt the growing industry of the mighty world about them. At first they were almost oblivious to it, but as the call of action in life's work increased among the millions surrounding them they began to feel it, too. First it was a vague restlessness; later a demand on their consciences that they too, join the army of workers and do something real.

"Today it is growing among them. They are giving less thought to their own humines had are yielding to the subtle force that binds each man and woman to take an active part in the world's work."

The separation was granted on the ground of desertion.

The Brokaw trial was one of the longest and most rensational in the history of separation suits in the State courts.

Mrs. Brokaw asked a separation and where Lewis was employed fished the bones of the cat out of the furnace of the hotel, and they have been turned over to Mrs. Brokaw asked a separation and \$2500 a month al'mony. She charged crueity and abandonment, and for days occupied the witness stand, teiling in detail how, as she alloged, she had been spied upon by servants at Mr. Brokaw's direction while she was staying at the residence at Great Neck, L. I., and Mr. Brokaw was at his hunting lodge at High Point, N. C. Her husband had neglected and slighted her, she claimed, and finally abandoned her. She attributed his conduct to unreasoning and unjustifable jealousy and bad temper.

On cross-examination Mr. Brokaw's counsel tried to show that her husband's jealousy was justified. She was asked about a house purty and other social happenings at Great Neck, and telegrams from the absent husband were produced demanding to know if such a man had been entertained with Mrs. Brokaw's woman friends on these occasions. Mrs. Brokaw persistently denied that she had ever carried on fliritations or in any way given her husband cause for jealousy.

BREAKING RULES.

BREAKING RULES.

"Many of the larger business institutions will dismiss any employs who is seen entering a saleon, and this custom is growing every year. You will find that, just as a player is dropped from the team at school for breaking the training rules, a man is dropped from the business world if he cannot keep a clear head.

"But to look at the matter from a purely personal point of view you cannot fail to see that every good point you possess is simply so much salary in your envelope, while every vice is just so much of a money loss to you." Consider that the first duty every young man starting out in life owen to himself is to live so that some day, perhaps ten or twenty years off, he will be able to be the man he ought to be and to live so that when he is the man he ought to be that man can have no reproaches for the man he vas."

producers' company in the Security bridging. Superintendent Cushing found reports from his fieldmen giving information in regard to recent strikes in what has, in the past, been alluded to as the 'break' between the East and West fields of the Coalings district. Recently four wells, controlled by four different companies, have got into the oil at an average depth of 1700 feet in this 'break' territory, and in the eyes formed in the section of the fill of the coal sand some disproved, and a company's well No. 71 (Section 23, 19-15), at a depth of 1700 feet, got into the oil and some time ago, the well flowing strikes: Empire Petroleum Company, well No. 1, in Section to the following strikes: Empire Petroleum Company, well No. 1, in Section to the oil sand some time ago, the well flowing strikes: Empire Petroleum Company, well No. 1, in Section 12, 19-15, bear center of the north half of northeast quarter, 250 barrels a day at a depth of 1700 feet; California Coalinga, No. 1, Section 3, 20-15, in southwest corner of northwest quarter, 250 barrels a day at a set as amo depth; Nevada Petroleum Company, well No. 1, in Section 15, 20-15, same flow at same depth.

This remarkable series of oil strikes in territory heretofore poorly regarded has been a matter of congratulation to the big operators in the Coalinga field.

IRRIGATING THESIS.

Following Dr. Jordan's talk 2 paper in the question of "Water for Irriga."

By the producers' company in the Security building, Superintendent Cushing found.

ceipt of bulletin 398, published by the United States Geological Survey, on the paleontology of the Coalinga district. The information in this bulletin was compiled by Ralph Arnold, one of the foremost geologists of the oll fields of California, the material being collected during two separate investigations in the Coalinga district, in 1998 and 1997.

Mr. Arnold discusses in this bulletin the general geology of the region, describing the fossils in detail. The work is of exceptional technical interest and value, in view of his discussion of the geologic strata of the district and the explorations made to determine the limits of the oil-bearing stratafication.

against the St. Paul-Freeno Oil Company for 12653.30 damages. The plaintiff company, which names Oil Center in the Kern field as its place of business, alleges, that on August 29, 1906, the defendants agreed to sell the plaintiff 50,000 barrels of oil and have so far delivered 43,742.44 barels. In addition to the damages asked the Associated sues for the cost of the suit.

Crown Oil Rushing Work.

FILLMORE (Cal.) Feb. 3.—Tressurer B. X. Dawson of the Crown Oil Company is in Filimore today arranging for the complete delivery of rig material for well No. 1. He says that the machinery will be mipped from Los Angeles whenever needed. Accompanying Mr. Dawson is Edward C. Miller, an eastern driller who has taken a contract to build the rig and drill well No. 1. Mr. Miller has moved his family to the company's new buildings and taken charge of the work. Drilling will be commenced within a few days and it is proposed to rush the work night and day until the company develops a producing well. Filimore people who have inspected the Crown Oil property are confident that the eomisany will develop many wells of high-quality oil and a number of resident people are stockholders in this new company.

handle all the refining oil which may be produced in the Big and Little Seepe districts, together with such other product now being produced in the Santa Paula and Piru fields.

Mr. Donovon is an oil refiner of many years' experience and thoroughly familiar with the high qualities of the little mustached type who so often forms the chief fun maker in French-film moving-picture shows. He is short and slight, with a curling the Ventura qil. In selecting the present location of the refinery, Mr. Donovon considered Brownstone Siding as a central point of distribution and incontemplation, of the large production which will be ferthcoming from the seepe oil fields, the selection of the refinery is considered favorable. This will give an increased impetus and stimulate production in the Sespe fields. It will also produce and guarantee a ready market for the production of Ventura oil.

REFINERY FOR VENTURA.

M. F. DONOVON TO BUILD.

Ventura county is to have an oil refinery of sufficient capacity to bandel the output of the various fields. M. F. Donovon and associates of Santa Paula are negotiating for the construction of an oil refinery at Brownstone Siding, about one mile west of Fillmore on the Southern Pacific Raliroad. It is proposed that this refinery shall be of sufficient capacity to handle all the refining oil which may be produced in the Big and Little Seepe districts, together with such

In Buying Clothes Buy the Best

That's our advice to every clothing buyer in Los Angeles; the best is ALWAYS the cheapest; shoddy goods are NOT cheap at any price; if you are not a judge you must rely upon the judgment of others. We have built up the largest clothing business in town by selling ONLY merchandise of the HIGHEST character, and never abusing the confidence of those placing reliance in our judgment.

Our Spring and Summer Men's and Young Men's Clothing Now On Sale \$10 to \$50

Those who appreciate EXCLUSIVENESS in dress will be interested in our own importation of the choicest patterns of English woolens, made up into Men's and Young Men's Spring Suits by the best tailors in America—patterns confined exclusively to this institution. Prices range \$20

# ington Heights School -to-Date Work Started e Hollywood High.

The Building Committee of the Board of Education yesterday accepted plans for the new Arlington Height school. Twenty thousand dollars has been appropriated for this building, which will be commodious and mod-

been appropriated for this building, which will be commodious and modern.

"It has been our idea to call upon different architects for plans of the school buildings," said if. W. Frank, of the Building Committee. "for the reason that while the interiors of the buildings must necessarily be more or less alike, we wish to vary the style of the exteriors, as much as possible, and to thus give individuality to the schools; and every architect has a style quite his own,"

John P. Krempel is the architect of the Arlington Heights school. There will be eight classrooms, a teachers room, principal's room, emergency or restroom, and convenient storerooms and supply closets. The teachers room will have a small pantry adjacent equipped for use in preparing a cup of tea, or any necessity. The hasement, which will be thoroughly freproof, will contain the heating plant, the motors, fuel rooms, and vacuum cleaning plant.

There will be a solid brick foundation and two stories of frame, in a heat style of architecture. There will be maple floors throughout, the walls will be wainscotted and tinted in harmonious colors. The fan system of the acting and ventilation will be used. All rooms will be wired for electricity, and the plan, with a central hall upon auch floor, upon which the rooms all open, assures plenty of outdoor light and in. Three ample exits will give casy egress from the building.

Ten lots, making a plot of ground 200300, has been purchased for the site, on Seventh avenue, about 150 feet north of Washington street.

Bids for the new Manual Training Sigh School will be called for in about two weeks. A four-room building will be put up on Marengo Heights, as at first planned.

Ground for the new Hollywood High School was broken, early in the week, and the work will be pushed rapidly to completion.

CONDEMNED BY LION HUNT IN CITY; THEIR YEARS

Oslerization Begun in City Street Department.

Workmen Above Sixty Years Dropped.

Terrible Thing for Laborer to Grow Old.

Osierization of employes of the street department seems to have been the dictum of President Works, backed by the Goo-goo Council, for the street pay roll will be minus twenty-odd names—those of men past 60 years of age—at the end of this month.

The men who were divpped by order of Street Superintendent Laws were not dismissed because of lack of fidelity, but because their age prevents them from giving what commercial standards term "a day's work."

work."

The attitude assumed by the Council," said Laws yesterday, "caused a serious discussion of the situation between Mr. Humphreys and myself. If it is intended that every man on the pay roll must perform a day's work, a full task, as it were, then the men dismissed are not capable of doing the necessary duty. That is the sole reason for their dismissal. They were not able to do the work of younger mea."

The Killing of the liops, which have been determined on in the street department, and that it will be enforced regardless of the age or other conditions, as that seems necessary in view of the attitude of the Council. It demands eight hours' work for eight hours' pay. The Council also backed up unanimously the charges of President Works that the street department is officered by politicians who do nothing but politics. This charge was referred to the Council. Stored and Alleys. of which St. Gregory, the Goo-goo, is chairman, but the committee has found nothing to begin an investigation of.

The dismissal of the "old guard," composed of what commercial men might term "superamunated laborers, led to the report that Superintendent Laws had fixed 80 years as the maximum age for any one to work in the street department. This was brought to the Mayor, who asked Laws about it.

QUADRUPLET CASE.

Witnesses With Knowledge of the Stranga Case Testify—Mothers of Children Known, One Married. Wilsons Petition to Adopt Alleged Triplets, Are Declared Dependent.

Events moved swiftly in the proposed investigation of the facts attending the quadruplet baby case yesterday. Judge Wilbur held an inquiry in his court early in the day, at which the widence of several witnesses was taken; when they were turned over to the tender mercies of the grand jury.

This was followed later by R. W. Reynolds, connected with the Juvenile Court, swearing out the necessary papers declaring the three children in the care and custody of Mr. and Mrs W. W. Wilson. No. 2019 Magnolia avenue, to be dependent children. This action does not apply to the quartete of babies concerned in the grand jury investigation, but to the trio that have been at the home of the Wilsons for some time, upon whom the impressionable married women have been showering their favors and kisses for some time.

This morning another turn of the case will appear in a petition to be presented by the Wilsona, asking that they be allowed to adopt the three children.

The trunk was brought to the city, and it was alleged in the complaint that when it, was delivered the lock was broken and the body crushed, the contents being damaged or lost. It appeared from the testimony that after the trunk was received here, the lady was notified during the ordinary course of business, but she did not call for it, and the trunk was taken to a fire-proof building.

During the night a fire broke out, and the trunk was damaged. It was alleged on the part of the express company that with the receipt of the trunk Mrs. Reeder was promptly notified, and the responsibility of the common carrier ended with that. The case was submitted.

The attendance at the meeting of the North, Northeast and Northwest Improvement Association was light yesterday, and no definite action was taken on any subject discussed.

It is proposed to take up vigorously the movement to cause the removal of the old street-railway viaduct on San Fernando street, and to have a clean-up of the old shacks on New High street north of Temple, which will come into prominence as soon as the Federal building is completed. I. W. Hellman will address the association at its meeting on next Thursday, and as he is a large property owner in the north section, it is thought he will speak of his plans for new buildings.

A paper which was presented at a meeting of the Pioneer Society at a recent meeting, was read, advocating the improvement of Vermont avenue into a boulevard 155 feet wide, from San Pedro to Griffith Park.

reads, a year having passed since \$1,000,000 of public funds was appropriated for that purpose. Today we are impelled to add, from what we discover of the trend of public opinion, that the people are beginning to look about for the reasons why there are no good roads.

Since the route of the good-roads system was determined and the bonds were voted the people have had little occasion to give close attention to the subject. It is perhaps time that a public project of such magnitude should have a little more publicity. To go back to private methods of business for a comparison, it is time for a report to the stockholders—the citizens of Los Angeles county.

to the stockholders—the chinesis.

A grand jury investigation of the good-roads situation might have many satisfactory results. It is by no means necessary to construe such an investigation as an aspersion upon the honesty of those who are working in or with or under the Highway Commission. It would be an excellent thing to have a report, even if such a report fully bears out the explanations of the Highway Commissioners as to the causes of delay and the impossibility of greater haste.

ers as to the causes of delay and the impossibility of greater haste.

If there is a flaw in any of the machinery that has been set to work on the good roads it would be an opportune time to discover it. The people set up this machine and they naturally are deeply interested in its workings. If there is too much friction in the main bearings, between the Highway Commission and the Beard of Supervisors, if the machine department occasionally edites a con-

friction in the main bearings, between the Highway Commission and the Board of Supervisors, if
the engineering department occasionally slips a cog
or has a cylinder that misses fire, if there are any
leaks in the supply tank, the people should be informed that their machine needs attention. If it
is merely a case of a heavy load, a steep grade,
and time enough to make it on the low speed, it
will encourage us greatly to know how near we are
to the top of the hill.

If the building of good roads is allowed to drag,
the chief incentive of the magnificent boulevard
system is defeated. We could have been reasonably
certain that in the next ten years a long stretch of
fine highways would have been improved in one
way and another. The object of the big bond
issue is to have a complete system of good roads
constructed at once, so that while we are paying
for them they will be paying back dividends.

A year has been spent on this project. There
are practically at present only such good roads as
existed before the project was started. Looking
at this aspect of the situation quite dispassionately,
it will not be misplaced effort if the grand jury
spends some time in ascertaining just what has
transpired in this year.

Los Angeles is passing through a period now,
when, like an athlete preparing for an Olympian
contest, she must be alive in every fiber. Three
great projects involve the expenditure of over
\$30,000,000. The aqueduct, the harbor and good
roads mean everything to the future greatness and
renown of the city and county. So far in the public works of improvement there has been no breath
of scandal, no suspicion of mismanagement or dishonesty, no disappointment in the efficiency of the
public servants chosen. Like the superstitious individual who boasts that he has never had a day's
sickness and hastens to "touch wood," it behooves
Los Angeles in making this boast to keep a vigilant
eye on svery public activity. On the same principle
that every car wheel on a train is sounded for a

Yet in Texas within a week a grand jury has Yet in Texas within a week a grand jury has found that private contractors impress into service and hold in a peonage every bit as bad as that reputed to Mexican contractors in the muck-raking articles on "Barbarous Mexico," hundreds of young men and old, that they sap them of their strength, work them until there is no more work left in them, and then leave them to die.

Still in Florida slavery exists in the contractors'

camps; it is no secret that peonage is practiced there and no adequate effort has been made by the authorities to correct the evil.

Still in Alabama, Louisiana, Mississippi and other Southern States white men are held in bondage every bit as ruthless as that alleged to rule in certain districts of Mexico; and the local authorities aid in covering up the facts from a public that waxes indignant over the conditions of a foreign

country.
Y tambien in Colorado it is openly charged and proved, with no derial on the part of any one, that men are bought and sold in mining camps and

have no more chance of escape than had the black slaves of the South in the days before the war.

In every one of these instances—and that of Texas is but the most recent in the public mind—the workman is so loaded with unwittingly incurred obligations and is so kept buried in debt by charges for food, rent and clothing that he cannot labeling the charges for food, rent and clothing that he cannot labeling the charges are the statement. hope to escape. Mexico, with this notable exception—Mexico is legitimately trying to correct the evils (we have the unbiased testimony of hundreds of disinterested American residents of Mexico on this point.) while the authorities of the States concerned are doing nothing towards correcting the same or worse abuses that exist within our own borders.

We commend to the muck-rakers and the yellow magazines the scattered local conditions in the United States—first. Let them remember the mote and the beam. Let them bear in mind the fact that in the last forty years the history of Mexico has been one of unchecked progress—probably no country in the world in the same length of time has made such rapid comparative advancement in civilization. Let them know that they have learned no new facts—though they have overdrawn the picture until it is a caricature—that what is true of that against which they rave and rant is known to the authorities of Mexico, and that these authorities, long before the slime throwers began their defamation, were striving te correct the abuses.

And, above all, let them think how the American people would feel if a German or an Italian should come to America, should visit the slave camps of Texas, Florida, Alabama, Missiasippi and Colorado—where the authorities "stand in on the graft"—should return to their own countries, and, citing these exceptional cases as typical of the United States, should write and publish a series of scandalous articles entitled "Barbarous United States."

It is unsafe, unfair and dishonest to generalize from exceptional and sporadic instances—and, as the exploiters of "Barbarous Mexico" must well know this fundamental principle, The Times is compelled to doubt their sincerity in offering such ret for sale.

It is claimed that the mental breakdown of young Sidis, the Harvard mathematician who has been able to figure the fourth dimension, was brought about by trying to demonstrate that the Democrats had a change to win at the next Presidential election. The strain was too much for the

were \$699,742,252 in value, an increase of \$195,097,711.

The imports were \$50,000,000 greater than in the earlier high record year, 1907, while the exports were nearly \$200,000,000 less.

The increase in imports was particularly gratifying, in that it developed chiefly in manufacturers' materials, to the benefit of American labor and

American factory profits.

The decrease in exports arose chiefly in breadstuffs (we are using far more at home,) which alone fell off \$57,000,000 from 1908; meat and dairy products dropped also \$29,000,000, and food animals \$8,000,000. These three decreases together amount to \$94,000,000, so as our met export decrease was only \$25,000,000, it follows that our other exports, mainly factory finished and partly finished products, and crude materials for manu-facturing, increased \$69,000,000.

All these things considered, at home and abroad, 1909 was a pregnant year for foreign trade.

GOOD INVESTMENT.

The Inter-Urban Electric Company is about to extend its lines broadly through the valley lying east of Pomons. Bonds to the amount of \$300,000 re on the market for the expense. They bear the high rate of 6 per cent.

It is reported that all the banks throughout the territory where these lines are to run are bidders for part of these high-interest bonds. That is the right spirit to show. To be sure, it would be in a way better for us if new money could be had for this purpose. But, on the other hand, the taking of these bonds by the banks in the valley will proclaim such a degree of confidence in the future by financiers on the spot that the effect will be excellent. The investment looks good to us. Six per cent. is about the normal value of money on long loans. The building of the roads will enhance the value of every foot of property in the valley.

That the bonds are offered here at so high a rate of interest indicates a pretty stiff money market in New York. There is so much activity in business all through the country that the demand for funds is brisk. To this influence we must add the strong pull for gold being made from all South America, and, in fact, from all the world. It is reported that all the banks throughout the

WHAT GOOD ROADS SAVED.

W Gosler is a small town in the Hartz Mountains, Germany, owning a small forest reserve of 7500 acres. The people consider it one of their greatest assets. The patch of woodland affords a place for outings, and for hunting under proper restrictions. But it is substantially valuable also

The property is well managed and there is cut from it yearly wood which sells for \$25,000. This is \$3.50 per scre, a good revenue from land which would otherwise be waste, as it is unfit for agricul-

A generation ago the district was cursed with the worst roads in Europe. So small were the loads hauled that no profit was to be got out of the sale of wood from the forest. Wagons were wrecked and harness wore out so fast that all the revenue

from the wood was eaten up.

The managers of the little forest took up the matter with the city authorities and made so fine a showing that the construction of good roads was undertaken. It cost \$25,000 to put 141 miles of

roads in condition.

Then the forest man got his book and pencil. The annual cost of hauling the wood was decreased by \$2526, while the logging was reduced by \$2430. Wood theretofore gone to waste because it was inferior and would not my the cost of reting it to

revenue from the sale of wood increased \$8255 per

annum, paying back the cost of the roads in three years.

The comparative account showed that it cost \$7444 to put one of these roads in order and keep it so for a year. Over this road there was hauled in a year 479,000 cubic feet of wood. On the old road a load was only 110 cubic feet, and the cost of hauling the whole amount at \$3.60 s load was \$15,-282.80. After the road was improved the load was increased to 177 cubic feet, or 2622 loads for the year, against 4373 loads on the poor road. At the same price per load the hauling cost \$9547.20, showing a saving of \$5735 in the year's hauling. This was 75 per cent of the cost of improving this particular piece.

This was 75 per cent of the cost of improving this particular piece.

Now this road was macadamized, and cost most of all those improved, but the saving was greatest on this piece of best road. No account is taken of the saving in the longer life of wagons, harnens and stock. These items considered, the road probably paid for itself in one year.

There is no way of estimating the gain in the comfort of the driver or of the stock which did the hauling. Poor roads are the most costly things a community can have, as well as the most cruel.

UNCLE WALT, WARBLER.

The other day, or the day before, a cop was shown to the station door. "You're fired, my friend," said the sad-eyed chief, and his voice was grim with a strong man's grief. "A record new in this town you've made; you've shown it a peeler who was afraid!" And the news was flashed o'er who was afraid?" And the news was flashed o'er the country wide; there lived a cop with so little pride, so little courage and manly vim, that he side-stepped Death when it made for him! And all of the country marveled then; and any, did ever a race of men receive a tribute of higher worth since men infessed this one-horse earth? One copdodged death in a city's streets—one man of legions who walk their beats and gaze at danger with fearless eyes, and forward march where their duty lies. Their duty—that is the sacred cause! They die, and the world has no applause; they dare not think of their waiting wives, when duty asks them to risk their lives; they dare not think of the kids at home when down in the haunts of the wolves they roam; they dare but think of the town they guard, of the town that gives them a cheap reward. They do their duty so bravely well the world was jarred when a peeler fell!

## Do Your Gloves Really Fit?

Maybe you've always had the idea that it is a simple matter to fit gloves properly. For example, if a woman wants a black glove, size 61/4, in glace kid, all that remains for the saleswomen to do is to place it on her hand. and take her money. But we don't fit gloves that way, by any means:

When a customer comes to this Gleve Section, we select for her the glove that years of experience in glove fitting have taught us will best suit her particular requirements; if her hand is slender, probably a French or Italian make will be best; if she has a short, broad hand, with short fingers, a German glove

So we buy, here and there, abroad and in America, from the very best glove-makers, in such variety of leathers, shades and shapes that we can really FIT

Federated Improvement Association Appoints Committee to Secure a Promise of Judicious Expenditures Before Voting Three Million Dollars Demand for Five-Cent Electricity

The Federated Improvement Association of Los Angeles last night voted unanimously to ask the members of the Goo-Goo City Council for some pledge as to how the money will be spent before voting the harbor bonds next month. It was the opinion of the several speakers at the meeting that the bonds should be voted, but that every precaution should be taken to insure the wise expenditure of the mency before it is surned over to pubthe Goo-Goo City Council for some pledge as to how the money will be spent before voting the harbor bonds next month. It was the opinion of the several speakers at the meeting that the bonds should be voted, but that every precaution should be taken to insure the wise expenditure of the money before it is turned over to public officials.

The association appointed the following committee to take up the matter and to make public such promises as may be secured regarding the use the Council intends to make of the funds: President Frank S. Adams, Joseph Mesmer, A. A. Bayley, John G. Pope, Garner Curran, Capt. L. D. Hanson, Joseph H. Call and John T. Gaffey.

The following prescription is said to be the best obtainable for deranged kidneys, bladder or liver. Buy from any good druggist one-half oz. Murax compound in original sealed package, one-half oz. fluid extract Buchu, six one-half oz. fluid extract Buchu, six ozs. good, pure gin. Mix and take one to two teaspoonfuls after each meal. (Be sure to get the genuine Murax compound in original sealed package.) This remedy should be taken at first sign of kidney trouble, such as pans in the back, frequent or highly colored urination, scalding urine, rheumatic pains in the joints, dimmed vision, puffiness under the eyes. This allows the kidneys to purify the blood properly and prevents chronic rheumatism, diabetes or dread Bright's

HOW TO GET FLESHY.

VICTORY IS UNEXPECTED.

The victory of the Conservative Unionist party was unexpected even by them; they have attained a larger representation than the most sanguine expected. The largest claim of the Unitenist leaders was 237 members, and increase from 185 in the recent Parliament. The Lopdon Times, which is perhaps the most conservative in its predictions, gave the Liberals 25 seats. The recent House had 372 Liberals, 185 Unionists, 83 Nationalists (Irish party) and 45 labor members, making a total of 670 members.

The new Parliament will meet on February Is and proceed at once to consider the budget recently rejected by the House of Lords. The policy of the Liberal party has not yet been determined upon and it will be governed by the attitude of the Irish members upon whom it will be entirely dependent. The Irish leaders did not approve of several features of the budget at the recent session.

It is expected that the House of Lords will show its wisdom by introducing certain reforms which were advocated by Lord Salisbury when haves Pripue Minister, and other influential men. Lord Rosebery once presented a scheme to make that body more practical and less independent of the poople, which might have been adopted at the time but for the radical attitude taken by Sir Henry Campbell-Bannerman, the leader of the Liberal party, who objected to it because it did not so far enough.

Six Thousand Acres of Proved Citrus Fruit La With Abundant Water and Water Ownersh

Many marvel that we are able to sell proved orange land, at Riverside, with the famed red decomposed granite soil that produces the very highest grade of citrus truits, with water ownership and unlimited water supply, as low as \$300 the acre.

This is the way of it: We bought La Sierra Heights at a very low figure, before water was found on the land, pinning our money and our faith, our time and our work, to the belief that an ample water supply could be developed. WE'VE MADE GOOD. The water is there in unlimited supply. WE'VE GOT IT NOW.

The buyer takes no chances. The price has been made very low. We want the people to share our good fortune. We are go to build up one of the finest and most productive citrus properties in Southern California. The fact that

we shall hold and cultivate 2500 acres for the profits to be made indicates our faith in the enterprise. Our Horticultural Department plants, cultivates and manages the groves of non-resident buyers at the lowest charge consistent with expert and efficient service.

attitude of the better class of people toward the whole question, and of the proper relations of capital and labor. He declared that the completion of the canal will be a great menace to this city, and that immigration will come in such a volume that it will overwhelm us. He warned against artificial distribution and said the solution is largely a matter of heart and mind.

DISTRIBUTION QUESTION.

Mr. Watchorn took up the question of "Distribution" and said he wasn't sure that it is the term we want.

"It is a question where you are going to put a man when you ark him to leave where he is. Now, I think there are a lot of people howling about distribution" who wouldn't permit themselves to be distributed at all.

"There seems to be a general fallacy to the effect that every man who comes to America has nothing else to do but follow the plow—and maybe he never saw a plow before. I don't think city life is half so bad as we make it out to be."

He declared that there will never be any distribution of population so long as manufactories are piled up in the city where men can follow the trades of their choice. He said:

"There's no use asking a man to be a DISTRIBUTION QUESTION.

Positively Your Last Chance to Buy Crown Oil Stock at 7c a Share

You want CROWN OIL STOCK as an investment. You want CROWN OIL STOCK because it combines safe

ty of investment with possibility of enormous returns.
You want CROWN OIL STOCK the same as you do oth-

You want CROWN OIL STOCK the same as you do other good California oil stock shares because oil stocks are paying the highest monthly dividend-rate of any business industry on the Pacific Coast.

Oil Stocks are booming and prices are going upward. The consumption of oil is greater than the production and the price of oil per barrel is bound to soar because of this unquenchable demand. We expect to see road and fuel oil seiling at above \$1\$ per barrel at the wells and the high quality oil of Ventura county in demand at a much higher price. New companies are being organized, new fields are being prospected, while the old established dividend-paying oil companies are deepening their wells, giving increased production without additional cost. All this means A HARVEST OF PROFITS to be gathered by those who invEST EARLY in the new companies, and increased dividends by those now receiving a monthly dividend-check from the old companies. We say, positively, that those who invest their money wisely in a well-managed California oil company, owning or controlling good oil land in Ventura county, will, undoubtedly, receive LARGE RETURNS ON THEIR INVESTMENT.

Crown Oil a Popular Stock

The popularity of CROWN OIL STOCK is established and the public are investing eagerly because of the vigorous manner in which the company has rushed development work at the property and the aggressiveness, yet economical manner, in which the financial affairs have been conducted. Since organization the ONE AIM of the company has been to develop producing wells at the earliest date possible and at smallest expense.

Crown Oil has a Popular Management

Measure a man by his standing in the community and you are able to judge his qualities for good or evil. Measure the management of the Crown Oil Company by the organization plan of the company and you will be fully satisfied that its possibilities for success are greater than most any other oil company operating in California. Ours is a stockholders' company; its affairs will be conducted by the stockholders and all stockholders, rich or poor. will receive their proportion of profits from the production and marketing of oil. We have a moderate capitalisation. EVERY SHARE OF CROWN OIL STOCK WAS PLACED IN THE TREASURY. There is NO FREE STOCK for the promoters. We are promoting our own company and developing our own property.

Contract Let for Drilling Our First Well. Tuesday of this week, the Crown Oil Company let a contract to Mr. Ed. C. Miller of Los Angeles for building our derrick and drilling Well No. 1, Mr. Miller is now at the property and has assumed complete charge of the work. We will be drilling Well No. 1 within a few days. Our road work is finished, our new buildings are occupied by the workmen and a carload of rig material is upon the ground.

Today&Tomorrow You May Buy Grown Oil Stock at 7c 7 Per Share. After Feb. 5th You Must Pay the Advanced Price. (Now) ...

In order to secure CROWN OIL STOCK at the present selling price, cash or reserve orders must be mailed in your home town or city by midnight of February 5th. The next selling price of our stock may be 10c, 20c or 50c per share. Buy TODAY at 7c a share cash and reap the full benefit of your investment—both in the advance of stock and in the profits when dividends are forthcoming. Order for cash or reserve stock pending an investigation. If our property and management are not as good as represented, you need not pay for the stock reserved.

If you are a stockholder in a good California oil company, buy more stock. If you are not a stockholder BECOME ONE and prepare to share in the profits from the BIGGEST MONEY-MAKING INDUSTRY IN CALIFORNIA.

FINANCIAL. CTOCK DECLINES D BECOME VIOLENT.

An Onslaught by Bears, Gathering Distrust of the Business, and Po-litical Outlook Brought About Sensational Falls in Prices Which Affected Nearly Every Share.

FOR MANY MONTHS.

(ASSOCIATED PRESS NIGHT REPORT.) NEW YORK, Feb. 3.-Onslaught o an aggressive bear party and gather-ing distrust of the industrial, busines and political dutlook, brought about violent declines on the New York Stock Exchange today, with United States Steel heading the downward movement. Sales totaled 1,672,000 shares. A fourth was in steel, which early in the afternoon broke to 78, the lowest level reached since last September. The price today represented a break of 3 points from yesterday's closing of 4% from yesterday's States Steel heading the downward movement. Sales totaled 1,672,000 day's closing, of 4½ from yesterday's high, of 13% points from January 3. when the high record of this year was touched, and of \$17% from the price

touched, and of 17% from the price of October 2.

Thief inetrest centered in the decline of steel, but there was a violent liquidation of nearly every stock in the list, carrying prices down from six to eight points, with sensational breaks between sales. Because of the nervousness of the market, brokers cautioned clients to remain within call, ready to put up additional margins if necessary, and many whose accounts were on the "ragged edge" closed out, taking their losses rather than risk further declines.

The net price changes do not register the full effect on prices, as an effective rally occurred in the cleasing hour, when the bears bought freely to garner the day's handsome profit on the short side. At the low point, which came early in tha final hour, declines ran all the way to eight points.

The violence of the movement and

or the worker and the movement and the volume of the market, following prolonged and extensive a decline is has occurred, caused the demand to be regarded as a probable culmitation of the decline with a reversal large to the decline with the decline with the decline wit

VICTORIA (B. C.) Feb. 3.—Scandinavian missionaries returning from China report that circulars are being scattered throughout Central Chinastating the powers are about to divide the empire. The natives are told that France has an army on the Kwang SI border, and Russia is about to take Manchuria, while the fleets of many nations are gathered in Chinese waters, each nation ready to assist in the dismemberment of China. The natives are greatly agitated by the rumors. Among the returning missionaries are the Rev. Tornvall and family and Misses Olsen, who arrived by the steamer Awa Maru yesterday. They had an anxious time when leaving Fing Liang Fu, France, where they spent nineteen years a carter knocked over the god of the river, an idol at the end of a bridge, and spread reports that the missionaries had done this. They kept to the security of an official's house for a few days and then continued on their way without misruption. VICTORIA (B. C.) Feb. 1 .- Sci
